

# Pandora Search v2.0

## AppleScript for iTunes

[Formerly titled "Search for Pandora Stations"]

Find more **free** AppleScripts  
and info on writing your own  
at Doug's AppleScripts for iTunes.

This script will use the Artist, Album, or Composer of the selected or playing track as the basis for a search of the **Pandora** website.

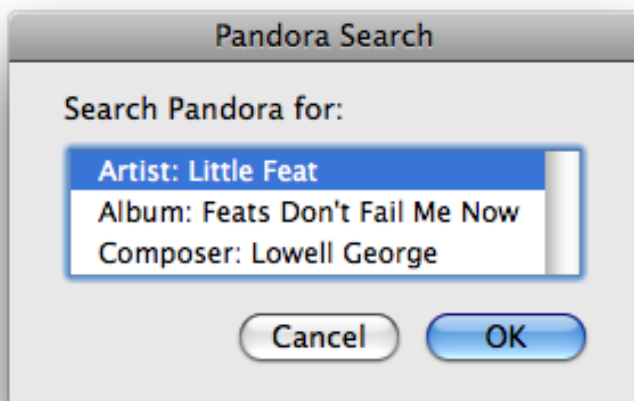

**This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. Click here for more info.**

### Installation:

**To manually install:** Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

### How to use:

While a track is playing or selected in iTunes, run the script. A choose box will appear, for example:

Click on the tag you wish to search Pandora with and click the "OK" button. In a few moments, your default browser will open a page at Pandora that (hopefully!) displays fruitful results
