

Search SlothRadio for Artwork v1.1

AppleScript for iTunes

Find more **free** AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

This script uses the Artist and Album name of the selected or currently playing track in iTunes to initiate a search for corresponding cover artwork using SlothRadio's Cover Finder via your default browser.

This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)

Installation:

If you installed the files from the downloaded disk image by dragging them to the "Installer", then the AppleScript and this Read Me document have already been installed in your *[user name] > Library > iTunes > Scripts* folder. The script will appear in iTunes' Script menu, where you can activate it by clicking on its name.

To manually install, if necessary: Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

How to use:

Select a track for which you want to find Album Artwork (if no track is selected and a track is playing, tag info from the playing track will be used) and run the script. Good luck on your search!

- Adam Glinsky contributed significantly to this script's development. Thanks!
