This script will make the selected tracks in iTunes bookmarkable.

Requires iTunes 5 or better.

This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. Click here for more info.

How to use:

Put this script in your iTunes Scripts folder. This is located in *user name* > Library > iTunes. If there is no folder named "Scripts" there, create one and put the script in it. It will then appear in iTunes' Script menu, where you can activate it by clicking on its name.

Select some tracks you want to make bookmarkable and run the script.
