Set Book Info In iTunes v1.0

AppleScript for iTunes
written by Elsan Debish

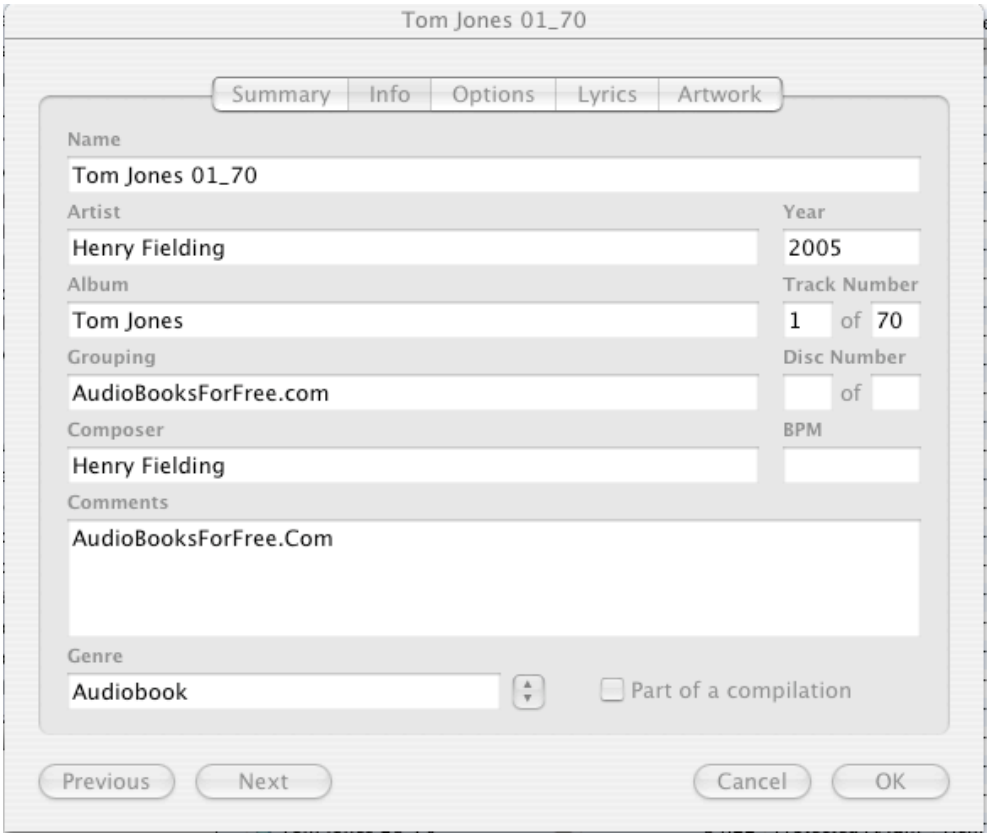
Find more **free** AppleScripts
and info on writing your own
at Doug's AppleScripts
http://www.dougscripts.com/itunes/

This script provides the ability to apply various track and chapter info to the track names/ grouping tag of the selected tracks. It caters specifically to audiobook titling.

How to use:

Put this script in your iTunes Scripts folder. This is located in *user name > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script in it. It will then appear in iTunes' Script menu, where you can activate it by clicking on its name.

Select some tracks whose tag data you wish to edit. The script asks for the book name, the author name, the grouping name and if the total number of tracks is not available, it asks for that. Then it runs through the selection and changes the track info from little or no information to something like this:



v1.0 aug 14 2006
- initial release

this doc last updated August 14 06

If you have any trouble with this script, please email me. ***Please note, however, that I am not the author of this script.***
My name is Doug Adams
