

# Set No Cover v1.0

## AppleScript for iTunes

Find more **free** AppleScripts  
and info on writing your own  
at Doug's AppleScripts  
<http://www.dougscripts.com/itunes/>

This script will apply a [no cover] graphic as the artwork to the selected iTunes tracks.

Also included is a droplet that will enable you to convert your own artwork as the default artwork used by the script.

**This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)**

### How to install:

Put the "Set No Cover" *folder* in your iTunes Scripts folder. This is located in *user name* > Library > iTunes. If there is no folder named "Scripts" there, create one and put the "Set No Cover" folder in it.

The "Set No Artwork" folder contains the **Set No Cover** script, the **Drop To Make No Cover Artwork** droplet, the **original no\_cover artwork** folder and the **no\_cover.pict** file. Please leave this folder intact.

### How to use:

Select some tracks and run the Set No Cover script from the iTunes Script menu. The no\_cover graphic will be applied to the selected tracks.

This graphic comes from the All Music Guide website (<http://www.allmusic.com>). I hope they don't mind that I borrowed it :)

### Use your own graphic:

Create your own no-cover graphic (in virtually any format) and drag-and-drop it on the "Drop To Make No Cover" droplet. This AppleScript droplet will convert your graphic—if possible—to a 200 x 200 pixel PICT file and replace the current no\_cover.pict in the "Set No Cover" folder where the script expects to find it. A copy of the original no\_cover.pict file is stored in the "original no\_cover artwork" folder.

v1.0 nov 29 2005  
- initial release
