

# Size of Artwork

## v2.0

For iTunes 12+/macOS 10.10+  
Find more free AppleScripts  
and info on writing your own  
at Doug's AppleScripts for iTunes.

This script will display the size (Width x Height) of the artwork of the single selected track.

OS X 10.10 and later only.

This script is Donationware. If you use it and like it please consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)

## Installation:

Put AppleScripts in your iTunes "Scripts" folder. This is located at *[user name] / Library / iTunes / Scripts /*.

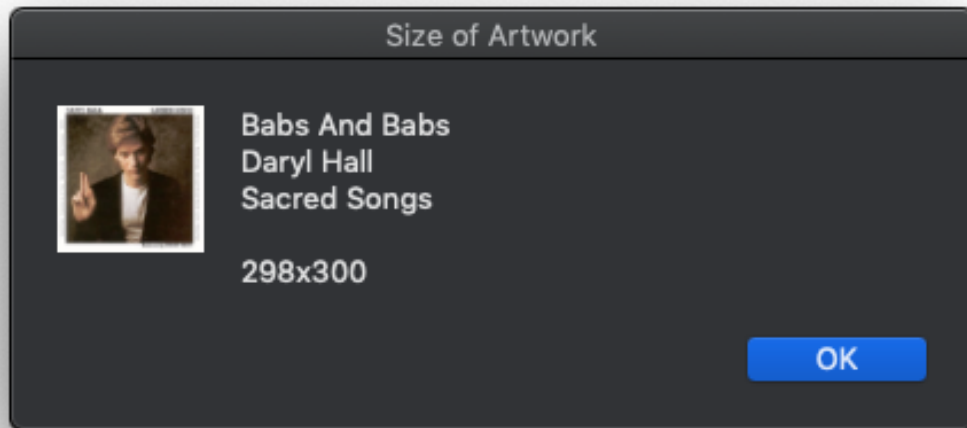

*The user Library directory is hidden by default. To make it visible, hold down the Option key on your keyboard and select **Go > Library** from the Finder.*

If the *[user name] / Library /* folder does not contain the "iTunes" or "Scripts" folders then then create them and put the script(s) in the "Scripts" folder. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

**See the online Download FAQ for more info and video on downloading and installing AppleScripts.**

## How to use:

Select a **single track** in iTunes and launch the script. A panel like this will be displayed:

After 30 seconds, the panel will dismiss itself, or you can click OK.

This script works great when assigned keyboard shortcut.
