

# This Is The Last Song

v2.2

For iTunes 11+/macOS 10.10+

Find more free AppleScripts  
and info on writing your own  
at Doug's AppleScripts for iTunes.

**Run this script to stop iTunes after the current track  
finishes playing.**

**This script is Donationware. If you use it and like it  
please consider making a donation to support my  
AppleScripting efforts. Click here for more info.**

## Installation:

This script is an **AppleScript applet** and can be run by double-clicking its icon in the Finder. However, it is probably **best accessed** from the iTunes Script menu.

Put AppleScripts in your iTunes "Scripts" folder. This is located at *[user name] / Library / iTunes / Scripts /*.

*The user Library directory is hidden by default. To make it visible, hold down the Option key on your keyboard and select **Go > Library** from the Finder.*

If the *[user name] / Library /* folder does not contain the "iTunes" or "Scripts" folders then then create them and put the script(s) in the "Scripts" folder. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

**See the online Download FAQ for more info and video on downloading and  
installing AppleScripts.**

## How to use:

While a track is playing launch the script. The script will monitor the progress of the track and when it reaches the end (the track's Stop time) the script will stop iTunes.

**It is *possible* that a second or two of the next track may start playing before iTunes has been stopped, especially if "Crossfade Songs" is set in iTunes Preferences--crossfade time is not accessible to AppleScript and thus cannot be factored. Under such circumstances the script will try and stop iTunes as soon as possible.**

## Helpful Links:

**Information and download link for this script is located at:**
