

Transfer Bookmark and Play

v2.0

AppleScript for iTunes

Find more **free** AppleScripts
and info on writing your own
at Doug's AppleScripts
<http://www.dougscripts.com/itunes/>

Transfers the bookmark point of a single selected iPod track to its corresponding iTunes track, or visa versa, with the option to play it. (That is, if you select an iPod track, the library track's bookmark is reset and can be played; if you select a library track, the iPod track's bookmark is reset and can be played.)

This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)

How to use:

Put this script in your iTunes Scripts folder. This is located in *user name > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script in it. It will then appear in iTunes' Script menu, where you can activate it by clicking on its name.

Select a track in either iPod or iTunes and run the script. If the selected track is an iPod track, its bookmarked position will be copied to the corresponding track in iTunes. If the selected track is an iTunes track then, likewise, its bookmarked position will be copied to the corresponding iPod track. If more than one iPod is mounted, you can choose which iPod on which to search for the corresponding track.

When the script has finished, you have the option of playing the track to which the bookmark setting was transfered.

v2.0 march 11 2006

-- completely re-written; uses iTunes 5 "bookmark" value; multiple-mounted iPods supported; playing the track is optional

v1.0 april 8 2004

-- initial release

this doc last updated March 11 06

If you have any trouble with this script, please email me.
