

Yahoo! Audio Search v1.0

AppleScript for iTunes

Find more **free** AppleScripts
and info on writing your own
at Doug's AppleScripts
<http://www.dougscripits.com/itunes/>

This script uses the Song Name, Artist, or Album of the selected or playing track as the basis for a search of the Yahoo! Audio Search site; results are displayed in your *default* internet browser.

This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)

How to use:

Put this script in your iTunes Scripts folder. This is located in *user name > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script in it. It will then appear in iTunes' Script menu, where you can activate it by clicking on its name.

If a track is playing or after selecting a track in the library, run the script. Choose the Song Name, Artist or Album from the choose box and click OK. Results will be displayed in a new window of your default internet browser.

v1.0 dec 18 2005
- initial release

this doc last updated December 18 05

If you have any trouble with this script, please email me.

My name is Doug Adams
